

The Hong Kong Amateur Radio DX Association consists of a specialized group of Amateur Radio Operators with a focus on "DX'ing". The reaching out, contacting and talking with other Amateur Radio Operators in other countries. The Hong Kong Amateur Radio DX Association is interested in Amateur Radio, organised for the promotion of and the interest in establishing long distance (DX) communications, the experimentation and education in the art of antenna construction, equipment construction, long distance radio propagation studies, weak signal communications, specialized operations and new technologies, and all operating techniques to achieve this interest.

Our members are from all walks of life and are interested from the hobby point of view. Our Association is not a politically orientated one and we do not want politics to control the running of the Association. We are a non-profit organisation and all subscriptions are minimal to assist in the running of the Association. Our website is written and produced by our own members and we welcome visitors to view the webpage at:  
<http://www.qsl.net/vr2dxa>

Many of our members are pioneers in the realm of VHF long distance communications holding most of the first time long distance awards from Hong Kong. Firsts of our members include: 2 meter EME contacts; WAC on 50MHz; DXCC on 50MHz; Gold Award IARU Region 3 on 50MHz; ITU Award on 50MHz; DXCC on Satellite; WAZ Award and many many more! You can say all the top VHF VR2 DX'ers are all members of our Association. Our Association has no religious or political motives and it is our strict policy that none should be introduced into our hobby.

We welcome any persons who are interested in joining our association to contact us and make enquires about membership.
