

Emergency
Communication
in Country Parks by
Mobile Phones

Do you know...?

Dial **999** or **112**

112 can connect your call to the 999 emergency call centre via any local mobile phone network covering your location.

Use Roaming Service

If your mobile phone has roamed to a Mainland network, dial 00852 and then the phone number of your family, friends or a Hong Kong police station.

Limitations of Mobile Phones

In hidden lowlands and valleys, it is more difficult to connect to a mobile phone network. **Please try making calls at a higher location.**

Other Advice

- Tell your location. Identify it by telling the number (such as H058) on the nearest distance post or any prominent landmark nearby.
- When using roaming service, 00852112 and 00852999 are invalid numbers.
- Do not hike alone. Switch off at least one of the mobile phones of your team and keep it for backup.
