

**Statistics on Customers of
Licensed Internet Service Providers in Hong Kong (Note 1) (since March 1999)**

After consulting the Hong Kong Internet Service Providers Association (“HKISPA”), OFTA has improved the arrangement for the publication of Internet Statistics. With effect from 1 March 1999, the following statistics on the Internet industry will be published on a monthly basis:

- estimated no. of registered customer accounts with dial-up access (excluding Internet pre-paid calling cards);
- estimated no. of Internet pre-paid calling cards for dial-up access; and
- estimated no. of registered customer accounts with leased line access.

With effect from February 2000, statistics on the estimated number of registered broadband Internet customer account will also be published on a monthly basis.

End of Month	Estimated no. of registered customer accounts with dial-up access (narrowband Internet access up to 1 Mbps) (excluding Internet pre-paid calling cards) (see Notes 2 and 3)	Estimated no. of Internet pre-paid calling cards for dial-up access	Estimated no. of registered customer accounts with leased line access (see Notes 2 and 3)	Estimated no. of registered broadband Internet access customer accounts (see Note 5)

03/1999	683,193	296,748	5,291 (see Note 4)	-	-	-	-

Note 1: The statistics are OFTA estimated figures based on the return from the Internet Service Providers (“ISPs”). They do not include users who are not customers of the licensed ISPs, such as users of the campus networks in the universities.

Note 2: Registered customer accounts refer to the customer accounts of ISPs (including those free-of-charge customer accounts). For a registered customer account which has more than one user login ID, it is counted as one registered customer account only.

Note 3: Registered customer accounts do not include customer accounts which are provided with e-mail addresses only.

Note 4: The estimated number of registered customer accounts with leased line access as at March 1999 has been adjusted to correct the errors of certain reported figures from the ISPs.

Note 5: Broadband Internet access refers to services with downloading speed of 1 Mbps or above using cable modem, ATM (asynchronous transfer mode), ADSL (asymmetric digital subscriber line), DSL (digital subscriber line) or other technologies.

Note 6: The drop in the number of broadband Internet access customer accounts in April 2001 was due to downward adjustment of the reported data from some operators.

**Statistics on Customers of
Licensed Internet Service Providers in Hong Kong (Note 7) (up to Dec. 1998)**

End of Month	A	B	C	D
	Estimated no. of customer accounts with switched access (see Note 8)	Estimated no. of customers with individual e-mail address under accounts stated in column A	Estimated no. of customer accounts with dedicated access (see Note 9)	Estimated no. of customers with individual e-mail address under the accounts stated in column C
12/1998	616,436	695,683	4,746 (see Note 11)	111,080 (see Note 11)
06/1998	422,391 (see Note 10)	582,620 (see Note 10)	3,901 (see Note 11)	91,303 (see Note 11)

Note 7: The statistics are OFTA estimated figures based on the returns from the Internet Service Providers ("ISPs"). They do not include users which are not customers of the licensed ISPs, such as users of the campus networks in the universities.

Note 8: This item refers to those customers who use dial-up lines to connect with the ISPs' servers for access to Internet.

Note 9: This item refers to those customers with dedicated access to their ISPs but it does not include the customer accounts which are resellers of Internet Access Service (i.e. the piggy-back ISPs).

Note 10: The estimated number of customer accounts with switched access (column A) as at June 1998 has been adjusted to correct an error filed by an ISP and to exclude the number of customers using Internet prepaid calling cards. The statistics as from June 1998 have excluded the customers using Internet prepaid calling cards. The estimated number of customers with individual e-mail addresses (column B) has also been revised correspondingly.

Note 11: The estimated numbers of customer accounts with dedicated access (column C) as at June 1998 and December 1998 were adjusted to correct the errors of certain reported figures from ISPs. The estimated numbers of customers with individual e-mail addresses (column D) have also been revised correspondingly.

Note 12: The estimated numbers of broadband customer accounts under "households" and "others" categories were adjusted to correct wrong entries made by one ISP previously.

Note 13: The drop in the number of broadband Internet access customer accounts in September 2005 was due to downward adjustment of the reported data from one operator.

Note 14: The estimated numbers of broadband customer accounts under "households" category was adjusted to correct an error filed by an ISP.

Note 15: The estimated numbers of registered customer accounts with dial-up access and Internet pre-paid calling cards for dial-up access categories were adjusted to correct an error filed by an ISP earlier.
