**Licensing of Mobile Services on Expiry of
Existing Licences for Second Generation Mobile Services**

I refer to the paper of Analysis of Comments Received, Preliminary Conclusion and Further Consultation dated 19 March 2004 under the captioned subject.

2. In the meeting held on 27.1.04 at OFTA, both FSD and HKPF requested OFTA to include a requirement for location service for emergency messages in the 2nd consultation paper on the captioned. It is glad to learn that such requirement has been included in the paper issued.
3. FSD fully support the initiation and development of the future second generation mobile services licensing conditions for the location service. It is expected that the location data provided by the service will enhance the emergency services provided to the public very significantly.
4. Should there be any query, please feel free to contact me direct.

(Tony TUNG)
for Director of Fire Services
