

Dear Sir,

The following are the comments in respond to the Consultation Paper of
"PROPOSALS TO CONTAIN THE PROBLEM OF UNSOLICITED ELECTRONIC MESSAGES"
publish on the June 25th of from our company.

83.

Is there consideration on controlling activities like selling email address which did not get consent from the email address owner ?

Even on email marketing activities, the sender had to stated when and where the email owner had given their consent. This is something more detail than opt-in but it define clearly their position of their mailing activities.
