**Hong Kong Telecommunications Users Group
Response to OFTA's
"Proposal to contain the problem of unsolicited electronic
messages" Consultation Paper dated 25 June 2004**

In response to OFTA's consultation regarding the "Proposal to contain the problem of unsolicited electronic messages", Hong Kong Telecommunications Users Group ("HKTUG") is pleased to provide our comments:

- The problem of spamming is increasing everyday. HKTUG is in full support of OFTA's initiative for anti-spam campaign to increase user awareness and available resources.
- HKTUG supports the anti-spam legislation as deterrence to unsolicited electronic messages. Although the percentage originated from Hong Kong is only 5%, legislation can join hand with other anti-spam countries to fight against spamming. The same parallel can be drawn to fight against global warming, all countries have to unite to gain the maximum effect.

We wish to see that the consultation exercise be completed as soon as possible so that the anti-spamming measure can be implemented.
